

Giebelstadt Climate Tables

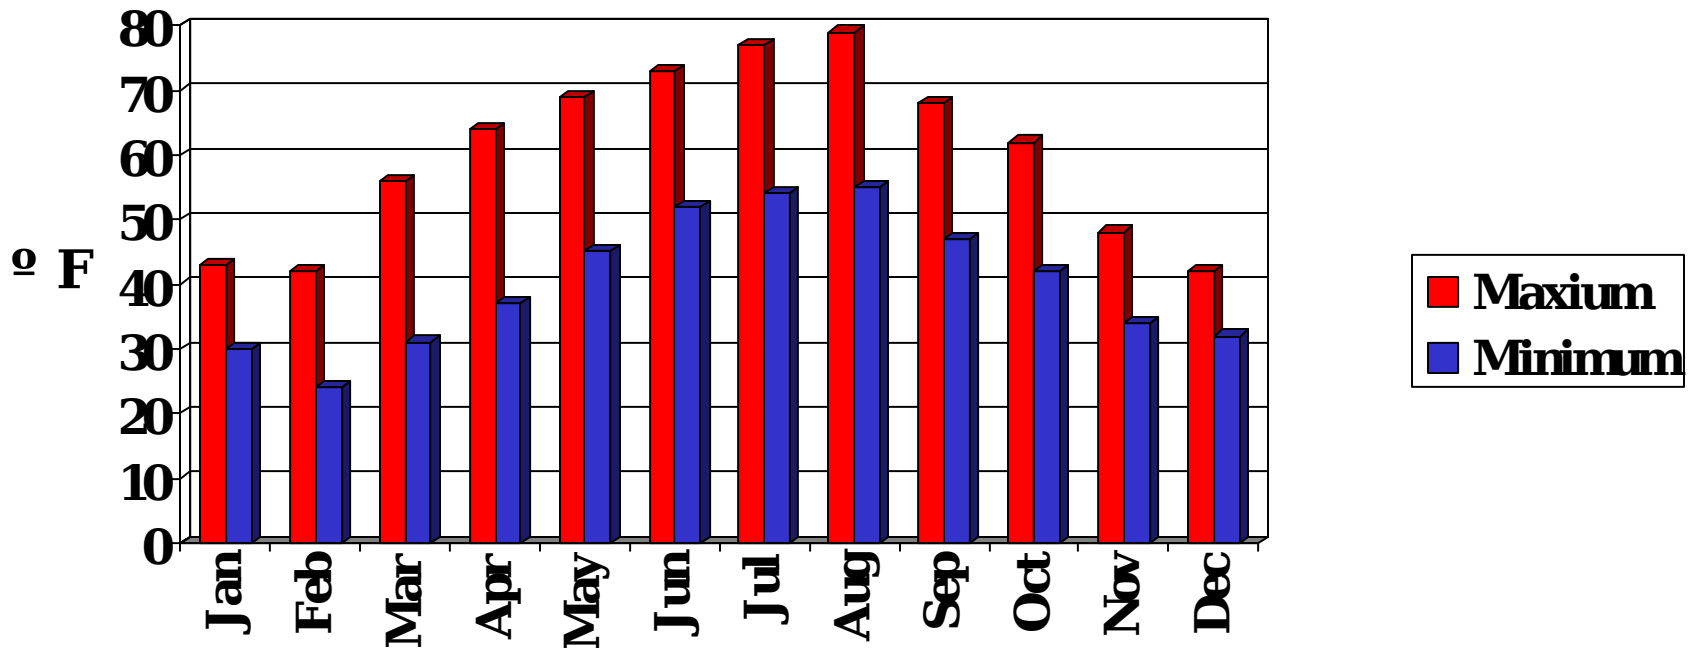

Climate period
January 1973 to December
1996

TEMPERATURE

- Maximum is the average daily high temperature for the month
- Minimum is the average daily low temperature for the month

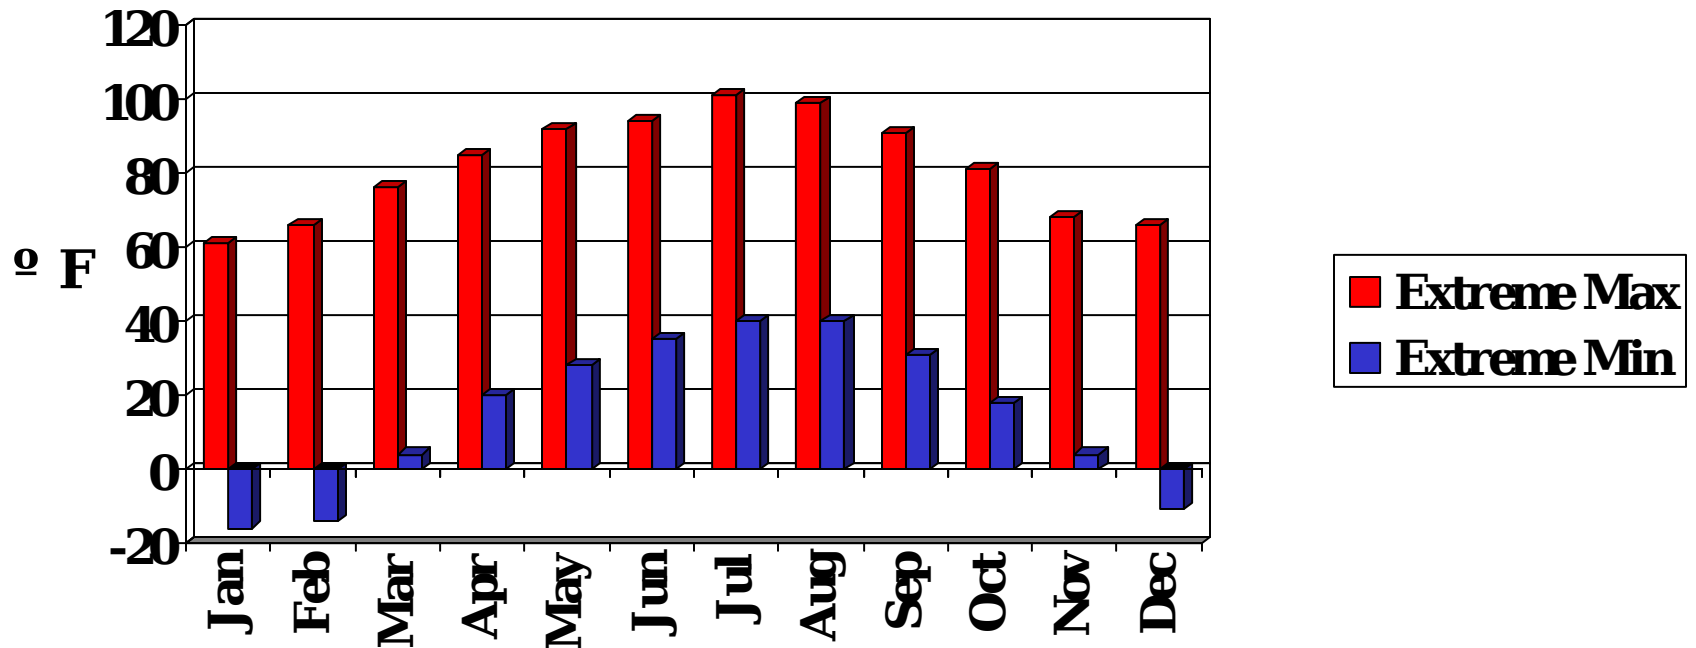

TEMPERATURE

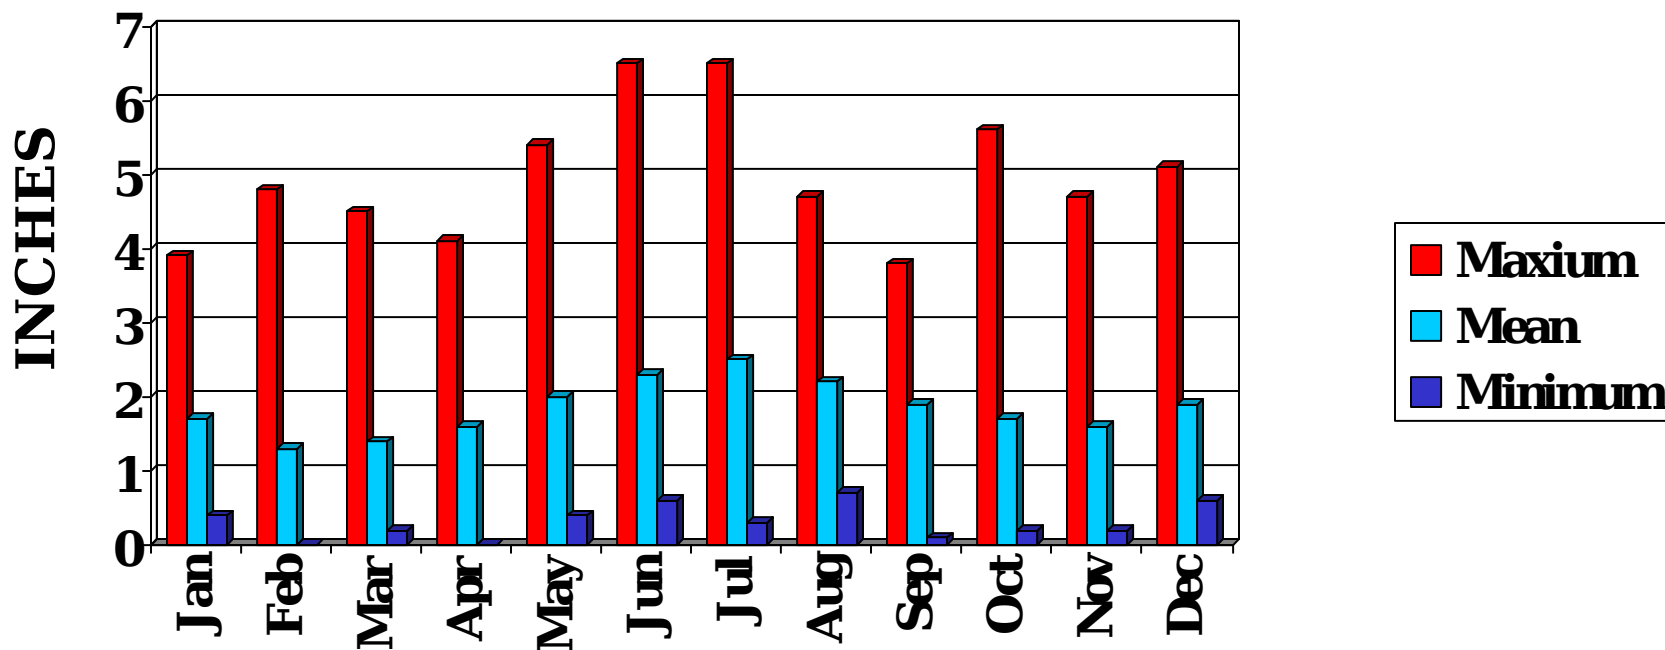

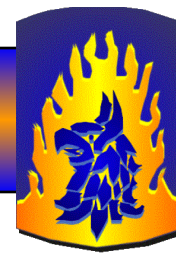

- Extreme Max is the maximum recorded temperature for the month
- Extreme Min is the minimum recorded temperature for the month

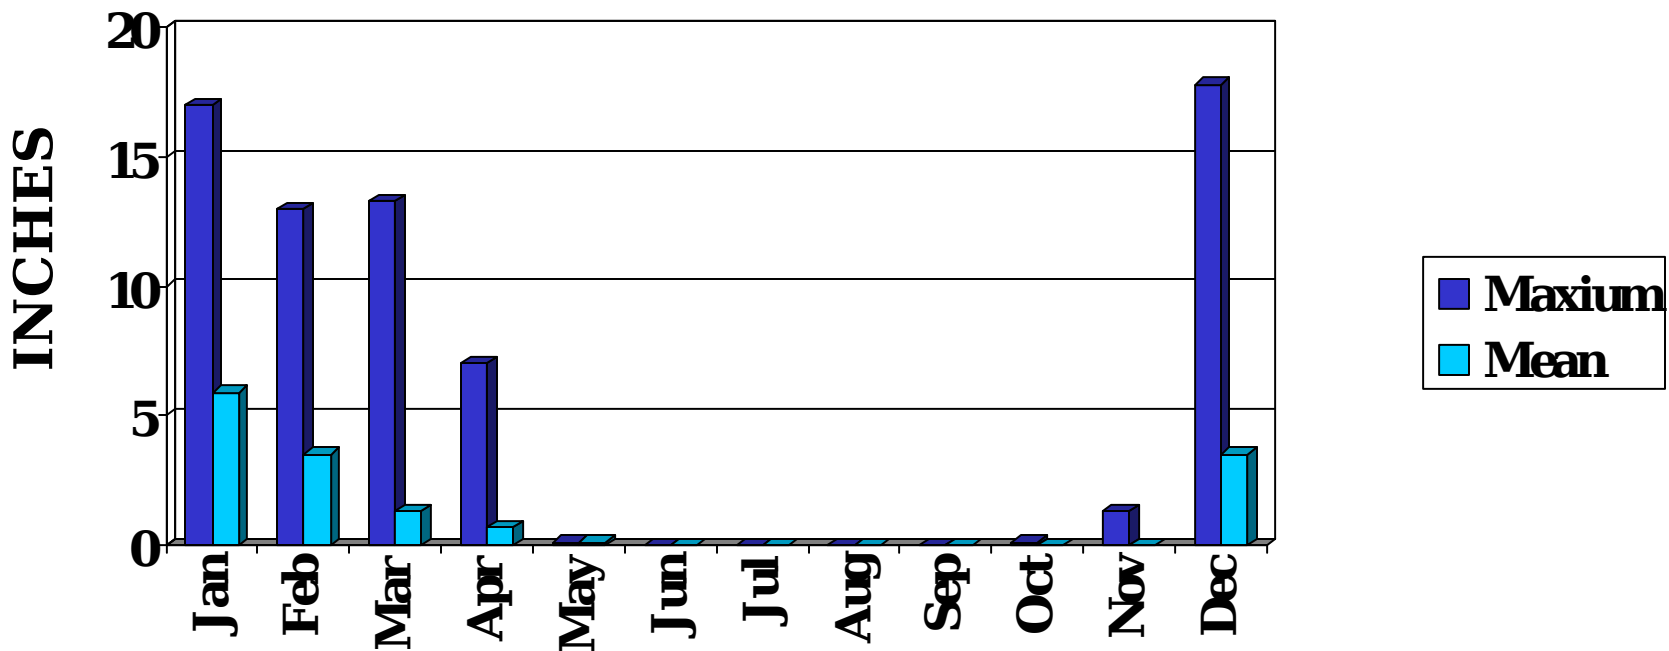

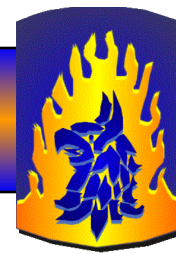

PRECIPITATION

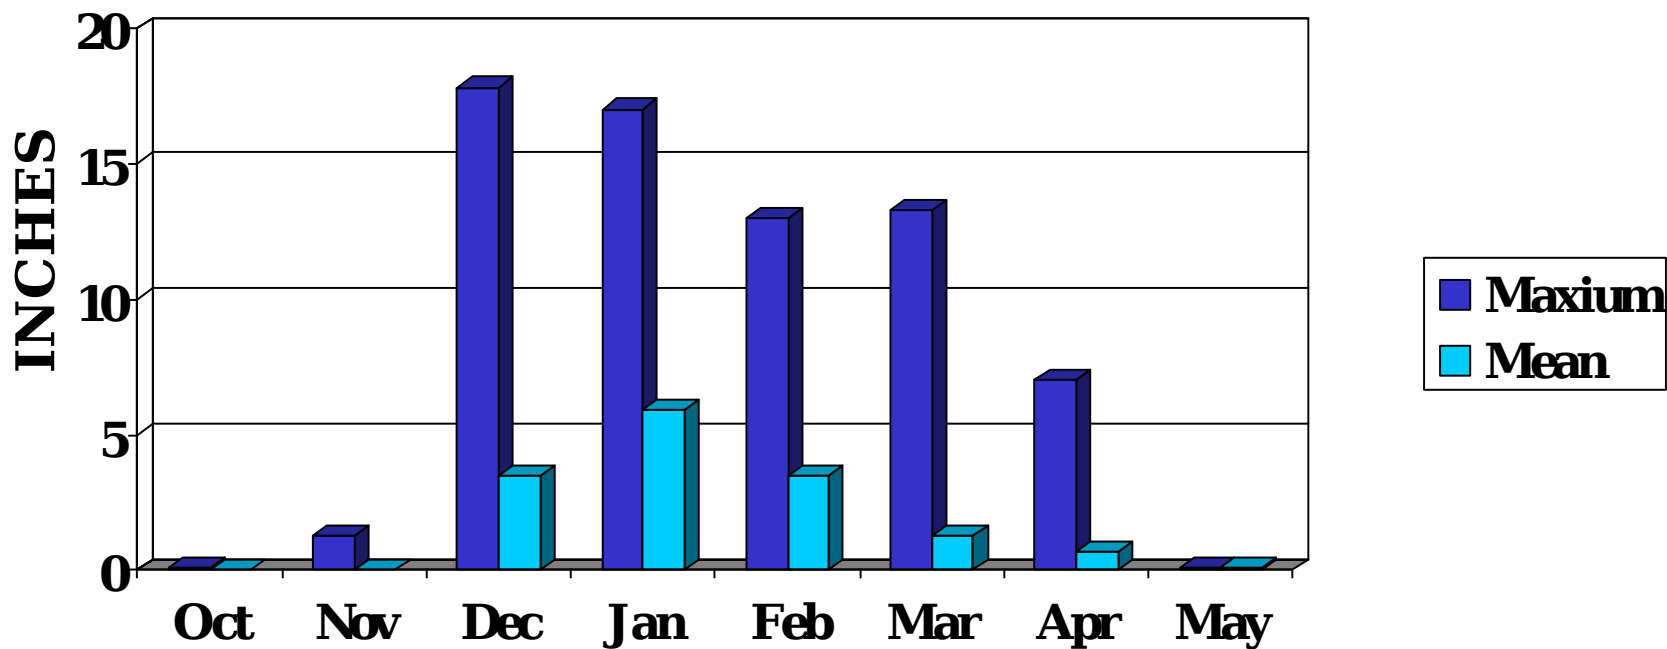

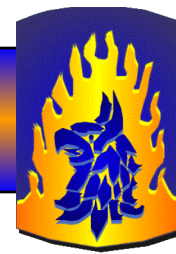

SNOWFALL

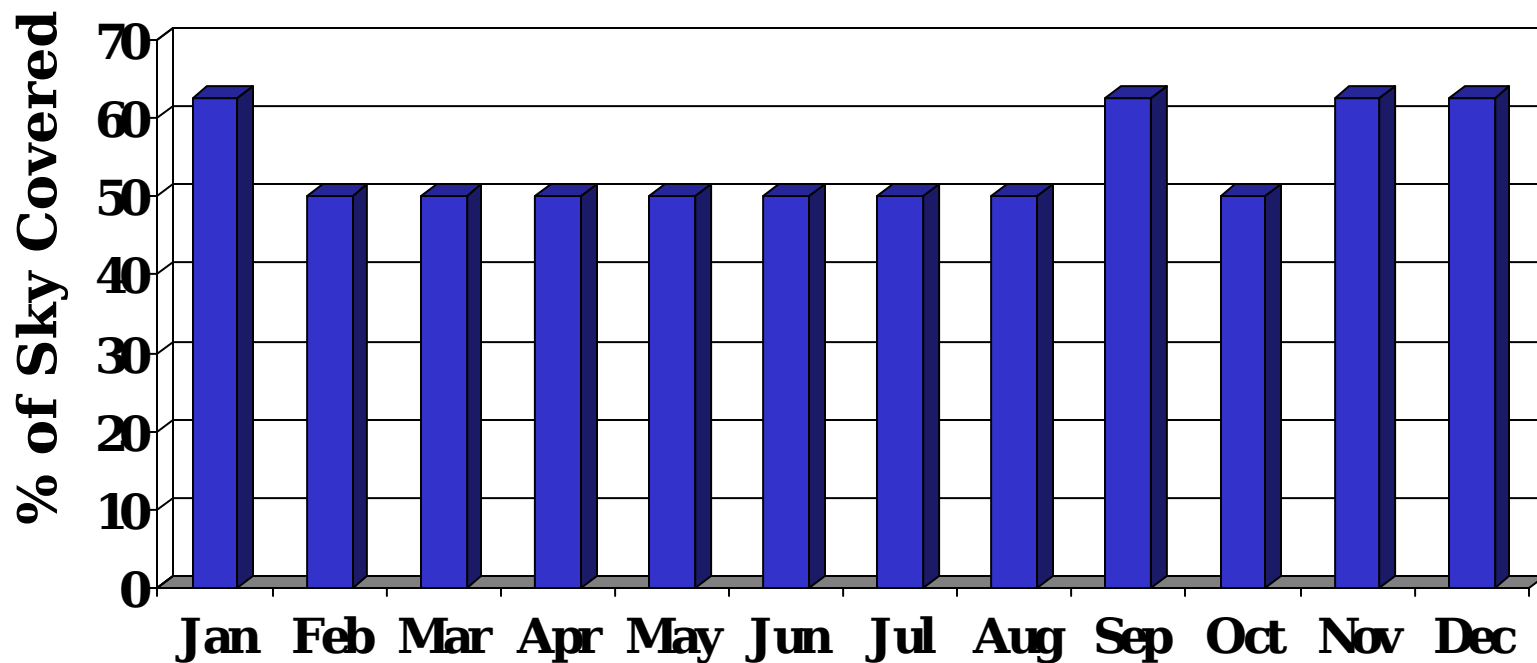

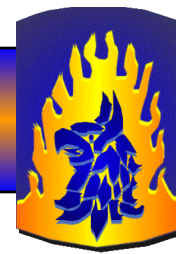

SNOWFALL

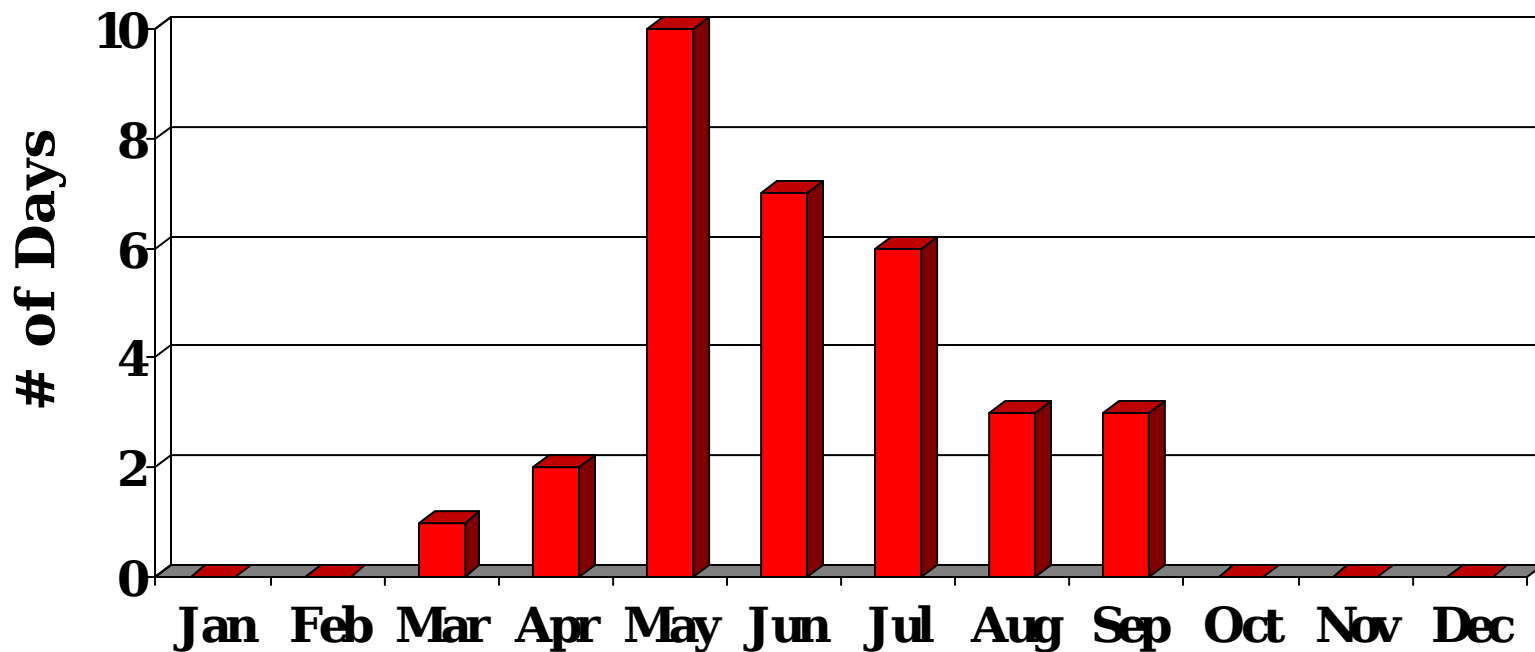

MEAN CLOUD COVER

DAYS W/THUNDERSTORMS

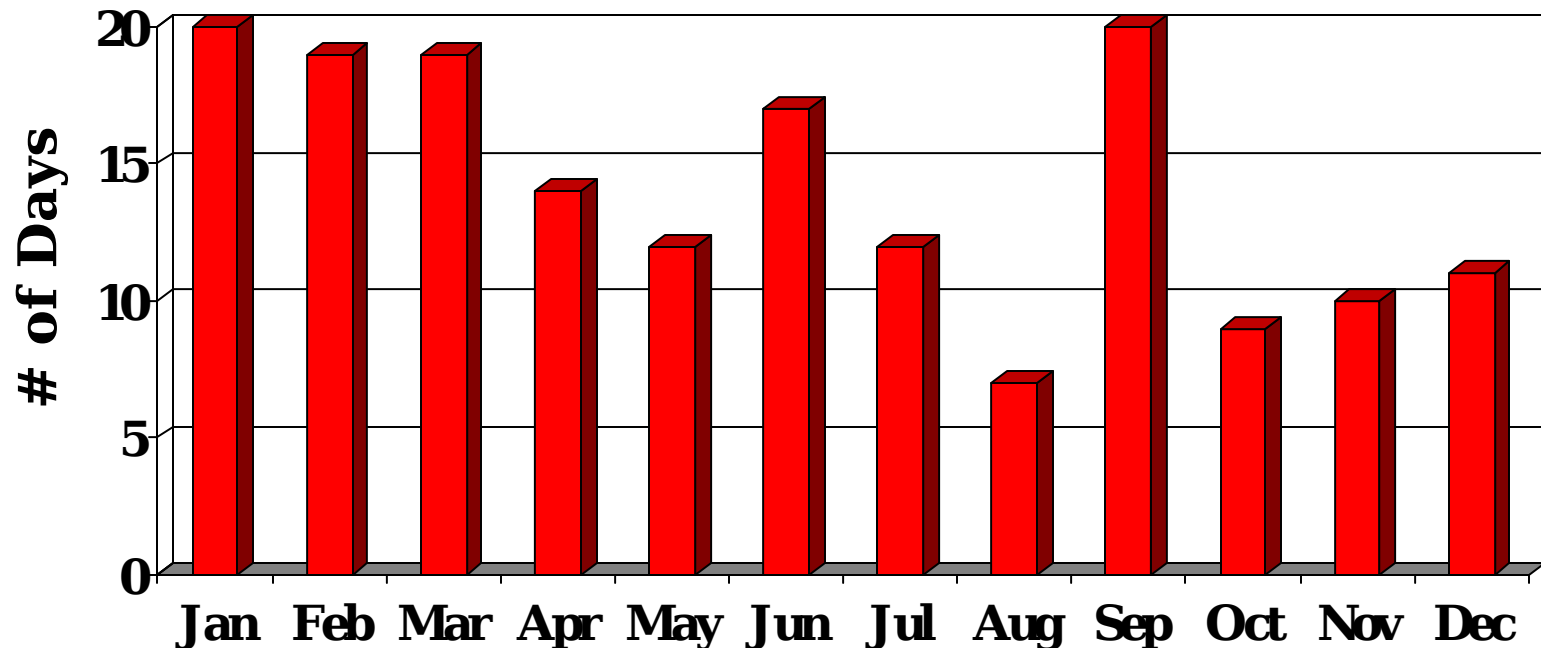

DAYS WITH FOG

- Days with fog when the horizontal visibility is less than 7 mile. That means.....

WIND SPEED AND DIRECTION

- Wind speed is given in knots (nautical miles per hour)
 - 1 mile per hour equals 1.15 knots
- Wind direction is given from the direction the winds are “blowing from”
 - For example, in May the winds are from the East. Therefore, if you stand facing the East, you will feel the wind on your face
